

**!! ATTENTION JOUR INHABITUEL !!**

*Séminaire SOLEIL*

## The Physical Review journals : our strength and our challenges

**Dr. Ling MIAO**

(Associate Editor, Physical Review X (<http://prx.aps.org>))

Invité par C. MIRON

**Mercredi 3 juillet à 14h00**  
**Grand Amphi SOLEIL**

The Physical Review family journals (PRL, PRA, PRB, PRC, PRD, and PRE) of the American Physical Society (APS) are the bedrock journals that the international physics community relies on. I will first briefly discuss the journals' status and their multifaceted contribution to physics and to the international physics community. I will provide some representative statistics on publications, citations and impact measures as well as some geographic and institutional comparisons.

Then I will give you an insider's view of the APS editorial system and peer-review process: On what basis do the editors evaluate new papers, choose referees, and accept and reject papers? How can authors navigate the review process productively ?

You may have heard about PRX (<http://prx.aps.org/>), the new member in the Physical Review family that covers physics research very broadly. But, what is really PRX ? What can it offer you? I'll answer these questions and others that you may have.

Last but not least, I want to learn from you: your view or perception of the Physical Review journals, what you see as our challenges in today's research and publishing environment, and your feedback on our editorial work. Such input will help our journals become stronger and work better for you.

**Ce séminaire sera suivi d'une pause-café**

*Formalités d'entrée : accès libre dans l'amphi du Pavillon d'Accueil. Si la manifestation a lieu dans le Grand Amphi SOLEIL du Bâtiment Central, merci de vous munir d'une pièce d'identité (à échanger à l'accueil contre un badge d'accès).*
