

Announcement of the sixth Accelerator Reliability Workshop October 15-20, 2017, in Versailles, FRANCE

We are pleased to announce **the 6th Accelerator Reliability Workshop, ARW 2017** , which will **take place in Versailles, France, from October 15 to 20, 2017**. ARW 2017 is hosted by Synchrotron SOLEIL and supported by ESRF, GANIL, Institut Curie, and the French Physics Society.

This is the sixth workshop in a series of successful workshops started by the ESRF (Grenoble 2002), TRIUMF (Vancouver 2009), iThemba (Cape Town 2011), the Australian Synchrotron (Melbourne 2013), and SNS (Knoxville 2015).

The ARW provides a venue for individuals from accelerator communities worldwide to meet and share their experiences on operating reliable facilities. The workshop fulfills the need to improve information exchange on technical issues and equipment reliability. It facilitates the opportunity for individuals to share their problems and solutions with their peers from other facilities, worldwide.

We look forward to welcoming you in Versailles and meeting you at the workshop.

Rossano Giachino, CERN, Chairman of the International Organizing Committee

Laurent S. Nadolski, SOLEIL, Chairman of the Local Organizing Committee
